# WATCH CASES AND DIALS FOR 25 YEARS

---

We support watch brands in the design and manufacture of cases and dials that combine technical sophistication with aesthetic appeal.

Based under one roof in La Chaux-de-Fonds, Artisans Boîtiers and Quadrance et Habillage combine their expertise to offer a service where excellence and creativity come together in every piece..

# EXPERTISE AND SKILLS

---

From concept to finished piece, we oversee every step of our value chain: **cases, buckles, straps, and dials.**

# WATCH CASES

---

Bringing a watch to life starts with a solid technical foundation. From 3D modeling to mass production, we support every project by combining creativity and reliability.

Our workshops work with everything from precious metals to technical and contemporary materials, in order to meet the aesthetic and technical requirements of fine watchmaking.

Each box is then sent to our polishing workshop, where felting, stone polishing, satin finishing, and sandblasting bring out the brilliance of each piece.

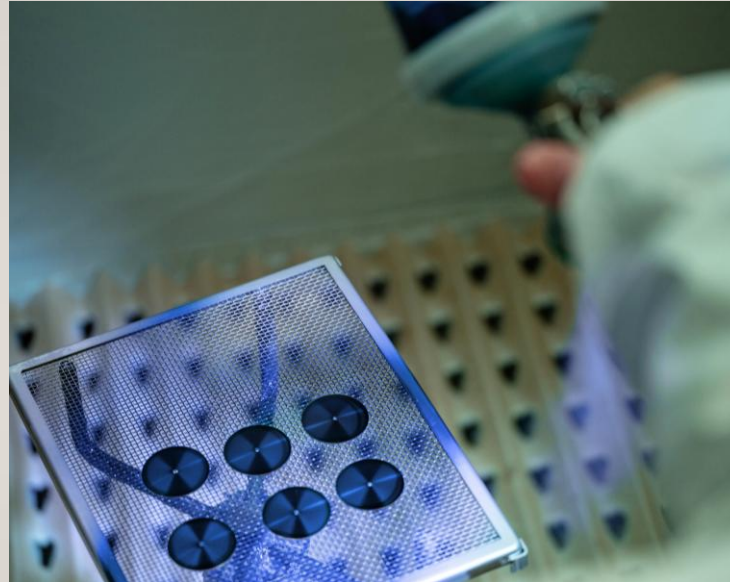

From assembly to finishing, each component is meticulously put together to create a flawlessly crafted box.

# DIALS

---

This is where the material takes on its color and luster in our electroplating workshop. Each piece is first carefully prepared—sanded, shot-blasted, and sun-dried—before receiving a custom treatment for long-lasting, flawless protection.

Oiling and varnishing seal the color and finish of each dial, creating a matte or glossy finish depending on the project's requirements.

Transferring and hand-applying decorations: logos, numerals, hour markers, and gemstones are meticulously set in place. This is where your brand's identity comes to life on the dial.

# LET'S BRING YOUR PROJECT TO LIFE
